Reactivating Windows 7 License From Home

The following instructions will walk you through reactivating your Windows 7 license from home.

1. Connect to the campus Cisco Anyconnect VPN
   a. If you've never used this VPN, it can be downloaded here: http://gmu.edu/depts/itu/tsd/tss/support/downloads/anyconnect-win-3.1.05152-web-deploy-k9.exe
   b. Install and run.
   c. When prompted for the VPN server, type: vpn.gmu.edu

2. Click on Start, type out cmd (do not press enter)

3. Right click on cmd.exe and click Run as Administrator

4. This will open a command window. Paste each of the following commands into the command window, pressing enter after pasting each in.
   a. cd %systemdrive%\windows\system32
   b. cscript slmgr.vbs -skms vigo.mesa.gmu.edu:1688
   c. cscript slmgr.vbs –ato

This should activate Windows. You can disconnect from the VPN at this point.

Thank you,
VSE Support
